PROJECTS

Book My Parcel – Parcel Booking & Logistics Management System

<https://bookmyparcel.co.in/>

Technology: React.js, Node.js, Express.js, PostgreSQL, JWT Authentication, RESTful APIs

Project Description

Book My Parcel is a full-stack web application that connects users who want to send parcels with verified travelers already traveling on the same route. The platform enables users to book parcel deliveries, track shipment status, make secure online payments, and communicate with travelers, providing a cost-effective and efficient alternative to traditional courier services.

- Developed a full-stack parcel delivery platform that connects users with travelers already traveling on the same route for cost-effective parcel delivery.
- Built secure JWT Authentication and role-based dashboards for Admin, Traveler, and User to manage bookings, deliveries, and transactions.
- Developed RESTful APIs and integrated PostgreSQL for user management, parcel bookings, shipment tracking, and payment records.
- Implemented real-time shipment tracking, and secure online payment gateway integration.
